

DREW JOHNSON

Senior Manager, UX Content Strategy

San Francisco, CA · rdrewj@icloud.com · 415-308-1665 · rdrewj.com

SUMMARY

Senior UX Content Strategy leader with 10+ years of experience building content systems for enterprise web and mobile products in financial services and healthcare. Deep background in content design, information architecture, governance, and cross-functional delivery at scale. Currently extending that work into AI-augmented content systems: building tooling, governance frameworks, and standards infrastructure that functions across both human and AI execution contexts.

CORE SKILLS

UX Content Strategy · Content Design · Information Architecture · Taxonomy & Labeling · Content Governance · AI Content Systems · Standards Architecture · Design Systems · In-App Education · Error & Empty States · Cross-Functional Leadership · Enterprise UX · Finance & FinTech · SEO & Findability · Analytics-Informed Content · HTML/CSS · Anthropic API · Vercel · GitHub · Google Analytics 4

EXPERIENCE

Senior Manager, UX Content Strategy March 2021 – Present

Charles Schwab · San Francisco, CA

Content lead for UX Creative Direction, driving content systems work across the design system, AI governance, and product delivery.

- Product & platform ownership: Owned UX content strategy for Schwab's mobile app across trading, banking, and account management experiences used by millions of retail investors.
- Information architecture & systems: Defined taxonomy, navigation, microcopy, and content patterns for dashboard and account summary surfaces, improving clarity and task completion rates.
- Search & automation impact: Scaled the Search Answer Widget ecosystem from ~50 to 550+ experiences in six months, delivering ~700K impressions within two quarters.
- High-risk content domains: Owned content strategy for onboarding, error states, empty states, disclosures, and in-app education in regulated financial workflows.
- Net-new product delivery: Led UX content for a bank lending product, creating end-to-end microcopy frameworks, error-handling standards, and support content.
- AI governance: Facilitated a cross-team AI content governance salon across UX, Legal, and Product — mapping where AI-generated content creates risk and where standards need to be machine-readable, not just human-readable.
- Standards architecture: Developed a dual-read standards layer: documentation structured to be both usable by content practitioners and executable by AI tools — closing the gap between how standards are written and how they're applied.
- Cross-functional leadership: Partnered with Product, Design, Research, Legal, and Engineering to align content decisions with business, regulatory, and usability requirements.
- People leadership: Managed and mentored four contract and FTE content strategists, ensuring quality, delivery velocity, and standards adherence.

TOOLS & PLATFORMS

Figma · Jira · Confluence · Workfront · Slack · Google Analytics 4 · Adobe Analytics · Siteimprove · BrightEdge · Anthropic API · Vercel · GitHub · Microsoft Office · Google Workspace

INDEPENDENT WORK

CSX Audit Tool — Built a content strategy audit tool using the Anthropic API that scores URLs across four dimensions: clarity, scannability, structure, and credibility. Deployed on Vercel. Currently evaluating as a lead-gen asset and potential SaaS product.
